### Step 1: Installation of left and right rearview mirror speakers

Remove OEM rearview mirrors and replace with supplied mirror speaker units utilizing the supplied 8mm or 10mm installation hardware and required. See pictures for details.

8mm Bolt

10mm Bolt

## Step 2: Installation of amplifier unit

1. Find a well ventilated weather protected place to mount the amplifier. It is not recommended to install the amplifier in a poorly ventilated area such as the underseat storage compartment or near anything hot, such as the exhaust pipe and radiator.
2. Attach the amplifier with a zip tie or double sided tape
3. Connect Right/Left channel wire to Right/Left rearview mirror speaker wires
4. Choose a location to mount the power switch, the underseat storage compartment is recommended.
5. Please see photo for wiring details.
